About me

I am a motivated, adaptable and fast learner Information Technology graduate who is always seeking new knowledge and challenges. I am a resilient person who has a methodical, problem-solving approach to work, and can manage well extreme pressure.

In addition, I can build partnerships at work bringing people together to accomplish great things.

Technical Skills:

- Proficient in creating and maintaining static HTML, CSS, and JS pages.
- Experienced in developing both animated and static pages using ReactJS.
- Skilled in creating and enhancing features.
- Worked with a diverse technology stack including AngularJS, Sass, JavaScript, Kafka, React Native, and Ruby on Rails.
- Conducted unit tests using Jest and Karma.
- Capable of creating and maintaining products in various programming languages.
- Adept at addressing incidents reported by users and monitoring performance.

Tools and Technologies:

- Familiar with tools such as Jenkins, Docker, Vagrant, AWS, Terraform, Grafana, Ansible, Bitbucket, and Jira.
- Proficient in working with Kanban and Agile methodologies.
- Competent in Linux, AutoCAD, GitHub, and NodeJS.
- Experienced with additional technologies including Vite, Remix, SEO practices, Karma, Jest, React Hook Forms, and other ReactJS libraries such as React Query.
- Familiar with content management systems like WordPress and e-commerce platform Magento.
- Frontend technologies such as jQuery, and Velocity.

Experience:

Senior Software Engineer, UOL (2023 - Present)

- Developed and implemented the Uolhost Components Library, a company-wide design system utilized across diverse products.
- Created and maintained static HTML pages using internal tools provided by UOL.
- Developed animated and static pages using ReactJS and Next.js.
- Implemented new features for Uol, Bol, and Webmailpro email platforms using AngularJS, Sass, JavaScript, Ruby on Rails, Kafka, Docker, and Vagrant.
- Developed and maintained Uolhost Panel, a new hosting product, using ReactJS.
- Conducted training sessions for new team members.
- Addressed incidents reported by users for all products.
- Utilized Kanban and Agile methodologies for efficient project management.
- Collaborated with various APIs, showcasing versatility in integrating external services.
- Created backend endpoints using Ruby on Rails to enhance system functionality.
- Acted as a team lead, fostering effective communication and providing guidance.
- Utilized Jira and Agile methodology for story creation, ensuring clear project planning.
- Played a crucial role in project planning, delivery, and estimation, consistently meeting deadlines.
- Demonstrated a commitment to comprehensive documentation practices, authoring detailed documentation for all projects to ensure transparency and knowledge sharing among team members.
- Authored README sections for project repositories, providing clear and concise information to facilitate easy understanding and collaboration among team members.
- Provided technical leadership and mentorship to junior team members.
- Offered guidance in architectural decisions and conducted code reviews.
- Led and contributed to project planning, scoping, and estimation.
- Collaborated with product managers to define project requirements and goals.
- Contributed to the design and architecture of complex software systems, emphasizing scalability, maintainability, and efficiency.
- Tackled complex technical challenges, providing innovative solutions.
- Effectively troubleshooted and resolved critical issues in a timely manner.
- Fostered a positive and collaborative team culture by collaborating with cross-functional teams, including product managers, designers, and other engineering teams.

- Stayed updated on industry trends and emerging technologies.
- Evaluated and introduced new technologies to enhance the development process.
- Conducted training sessions for team members on new technologies, best practices, and company processes.
- Supported the professional growth of team members.
- Interacted with clients or stakeholders to understand requirements and provided technical insights.
- Identified and mitigated risks associated with software development projects.

Mid Software Engineer, UOL (2022 - 2023)

- Created and maintained static HTML pages using internal tools provided by UOL.
- Developed animated and static pages using ReactJS and Next.js.
- Implemented new features for Uol, Bol, and Webmailpro email platforms using AngularJS, Sass, JavaScript, Ruby on Rails, Kafka, and Vagrant.
- Contributed to the development and maintenance of the Uolhost Panel, a new hosting product, utilizing ReactJS.
- Addressed and resolved incidents reported by users across various products.
- Monitored system performance.
- Tools such as Jenkins, Docker, Vagrant, AWS, Terraform, Grafana, Bitbucket, and Jira.

Web Developer, IBM (2021- 2022)

- Created and maintained static HTML pages for Latin American countries through handcoding, ensuring a seamless user experience.
- Developed web pages using Drupal CMS, implementing dynamic and scalable content management solutions.
- Designed and implemented animated pages using JavaScript animations to enhance user engagement and visual appeal.
- Contributed to the creation and maintenance of web pages for IBM Supply Chain offerings on a global scale.
- Collaborated on a Vue.js application, interfacing with an API containing a list of IBM supply chain partners, thereby streamlining data retrieval processes.
- Conducted training sessions for new team members, facilitating their onboarding and ensuring a smooth integration into project workflows.
- Assumed responsibility for incidents reported by users, addressing and resolving issues promptly to maintain the integrity of React applications.
- Monitored and optimized the performance of web applications to enhance overall efficiency and user satisfaction.
- Worked with Google Analytics Studio, specializing in the creation of advertisements and HTML5 ads, contributing to targeted marketing initiatives.

Web Developer, Freelance (2018 – 2021)

- Developed custom static pages using Drupal, WordPress, and other design systems, utilizing HTML, CSS, and JavaScript.
- Collaborated with clients to understand their requirements, ensuring seamless integration of design and functionality.
- Created responsive and user-friendly interfaces, optimizing website performance and user experience.
- Implemented best practices in coding, adhering to web standards and ensuring cross-browser compatibility.
- Managed multiple projects simultaneously, delivering high-quality work within strict deadlines.
- Cultivated strong client relationships, resulting in a high rate of client satisfaction and repeat business.
- Demonstrated self-motivation and effective time management skills to work independently and meet project goals.
- Continuously improved skills and stayed up to date with industry trends through self-learning and professional development opportunities.

EDUCATION (2010 – 2014)

Al-Balqa' Applied University BAUAl-Balqa' Applied University BAULICENSES & CERTIFICATES:

Enterprise Design Thinking Practitioner

The Web Developer Bootcamp 2020

AWS Cloud Practitioner Essentials Day
